

## Solar Street & Security Lights

### LED Lighting System

Solar powered light systems from EV SOL are the reliable, renewable and remarkable way to light an outdoor space.

Whether to enhance security, improve commerce or create visibility, solar powered lighting is an economic and environmental choice for your parking area, roadway, public park, university campus, shopping centre, bus stop or security fence.

Solar lights are a visible statement of your commitment to the environment. With advanced LED lighting, optics and intelligent controls, solar lights have never been brighter or more versatile. TSR solar lighting... patented, technologically advanced and environmentally friendly.

Installation of traditional lighting requires trenching and underground wiring. The process is lengthy, costly and inconvenient to others. Then, you have the endless expense of monthly electrical bills. To change from conventional lamp-heads to LED, electricity bills are reduced by 75% and 100% with solar.

Costs associated with underground wiring are often greater than newly installed solar lights.

**90w Mini Sun Diamond Series**

The TSR Lighting System (Sun Diamond Series) is designed for installations anywhere in the world.

**No electricity bill:** Non-metered, no cost energy provided by the sun (even on cloudy days).

**Green Energy:** Light is produced in a non-polluting, environmentally responsible way.

**Reduced Installation costs:** Installation of photovoltaic LED lighting systems require no wiring of any kind. Once the fixture is up on the pole, installation is complete.

The savings can be enormous for off grid locations due to the elimination of grid connection.

**•Long Lasting:**

–Incandescent Bulbs -1,000 hours

–Fluorescent Bulbs -10,000 hours

–LED • **50,000-100,000 hours**

**•Slash your electricity bill:**

–ROI of just a few months is realistic by replacing conventional lighting with **LED & solar.**

**•Quality**

**•Rugged Durability**

**•Energy Efficient**

**•Eco Friendly**

**•Cost Effective**

**All our solar lights are custom designed. Please contact us with your requirements.**
